SLEEK AND PRACTICAL

SLEEK AND STYLISH

Combining modern styling with practical functionality, Vertical Blinds incorporate fabric vanes that can be tilted or stacked to the right, left or centre depending on your unique light requirements.

Perfect for sliding doors, Vertical Blinds are available in a huge range of colours and fabric types, from translucent to block out to suit any room within your home.

PATENTED BLADE ALIGNMENT

The unique patented self alignment mechanism in the slat travellers ensures the vanes are always equally spaced and guaranteed to hang straight and parallel, ensuring smooth operation even on the largest blinds. When a vane is brought out of line, it is automatically restored to its original position.

GREATER CHOICE

The choice of fabrics is extensive, ranging from light filtering to block out to the latest developments in light controlling Sunscreens.

FLEXIBILITY AT HAND

The EOS® Vertical Track System is the most flexible solution for large, sloping and irregular shaped windows.

SLEEK DESIGN

The EOS® Vertical Track is the ideal window covering solution for every decor. The head rail and all visible components are slim and elegant in design. The sleek 25mm curved profile provides the perfect contemporary look, or for a more traditional feel you can reverse the profile and use the fabric insert option.

EASY TO REPAIR

Repair or replacement of Vertical Blades is made easy with the EOS® Patented Slat Traveller Hook. This hook can be easily removed with no tools required and is compatible with blades of any material.

LIGHT CONTROL

The EOS® Vertical Blades turn 200 degrees to ensure perfect light protection and minimal light gaps. The EOS® System includes a track top recess and the flush clip-in-bracket option mounts the track flush with the reveal giving maximum closure above the track.

EASY TO USE

The EOS® System is light and easy to operate. It requires very little effort to open and close.

MINIMAL STACK SIZE

The narrow vane travellers provide a much narrower blade stack.

RAPID STACK BACK FACILITY

The entire blade stack can be quickly and easily traversed across the track in a single movement making window cleaning a breeze.
