

LUXAFLEX NEWSTYLE® Polyresin Shutters

Modern styling for
internal & external
light & heat control for your home

LUXAFLEX® WINDOW FASHIONS

LUXAFLEX NEWSTYLE® Polyresin Shutters are the modern alternative to traditional wooden shutters and are virtually maintenance free.

Style & Finish

Modern colour range of Pearl, Vanilla and White to suit most homes internal & external colour schemes. The elliptical shaped louvre is available in 3 sizes; 64mm, 89mm and 114mm (White, Pearl). With a variety of frame styles, hinging and tracking systems are available to suit most applications.

Durable - Made from Polyresin

The Polyresin compound used to make the LUXAFLEX NEWSTYLE® Polyresin Shutter is colour fast with UV stabilizers designed for strength and durability, yet retains a special warmth and feel. The shutter will not warp, shrink, chip, peel, or fade and will never need painting making it suitable for **inside & outside your home**. The colour is a permanent finish resistant to dents and scratches. Should a scratch occur, it can be removed without harming the finish.

Water Resistant & Easy to Care For

LUXAFLEX NEWSTYLE® Polyresin Shutters have no unsightly staples which may rust, and will not warp, crack or swell due to water exposure. With a simple 2 part hinge they can be simply removed and washed with a hose. Ideally suited for all areas of your home including above kitchen sinks, bathrooms and external areas exposed to sun, rain and coastal environments.

Superior Light Control

Louvres can be rotated 180° to open or fully close in both directions, unlike other

shutters which are one directional only. The louvres overlap a lip in the frame to limit light gaps, blocking up to 85% of the light.

Patented Clearview Tilt Bar

Hidden louvre joiners provide an unobstructed view, giving our classic shutters a clean and contemporary look.

Fire Retardant

Polyresin compound is inherently flame resistant.

Modern Australian Manufacturing

Custom crafted in state of the art computerised production facilities located in Brisbane that meets today's demanding quality standards. Local manufacturing means a fast delivery and supports Australian jobs.

Child Safe & Non Toxic

Because there are no cords, and the Polyresin compound is non-toxic, LUXAFLEX NEWSTYLE® Polyresin Shutters are child safe.

Kind to the Environment

More than 95% of the Polyresin production waste can be granulated and recycled. Due to the longevity of the product's performance it will last longer than other alternative products, requiring less energy resources for replacements.

20 Year Limited Warranty*
