

The biggest innovation in
honeycomb
since we introduced it

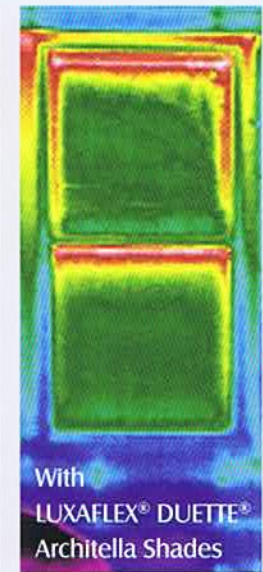

INNOVATIONS IN STYLE,
LUXURY AND SERVICE.

Where can you save energy in your home?

Without window coverings

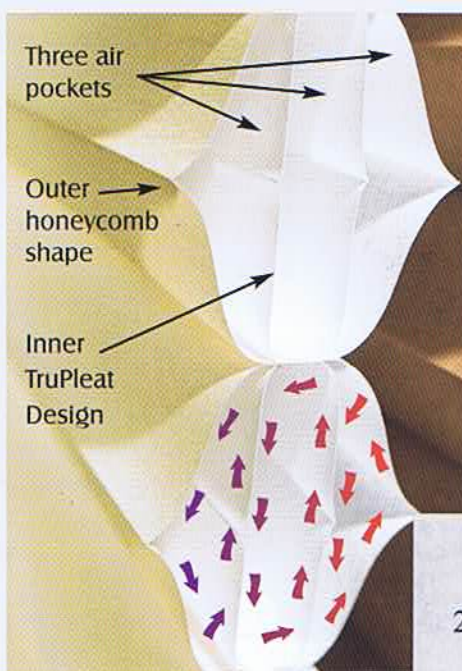

With LUXAFLEX® DUETTE® Architella Shades

Notice the LUXAFLEX® DUETTE® Architella Shades difference

Most of your home's energy is lost through windows as shown in this thermal imaging photo. Research revealed that up to 30% of heat loss from your home occurs through uncovered windows – choosing the right window protection can reduce heat loss through windows by up to 70% and save you around \$200 each year in reduced heating costs.#

DUETTE® Architella Shades feature a patented honeycomb-within-a-honeycomb construction dramatically increasing the product's ability to insulate in the winter and cool against summer heat.

How LUXAFLEX® DUETTE® Architella Shades work

- Three distinct air pockets for superior energy efficiency and increased insulation
- The inner TruPleat construction keeps every shade crisp and consistent from front to back and top to bottom
- Layers of fabric for more luminous colour
- Made from anti-static, dust-resistant polyester, making it easy to clean
