Features & Benefits

Uniform Headrail Design	The EasyRise, ULTRAGLIDE and LiteRise Headrail offers a sleek, streamline and uniform appearance across all three Operating Systems.
Fabric Covered Valance	The EasyRise, ULTRAGLIDE and LiteRise Headrail also features a Fabric Covered Valance, offering consumers an aesthetically pleasing and modern LUXAFLEX DUETTE Shade enhancement. The smooth and even weave of the valance has excellent care and cleaning properties, which makes it easy to clean.
Improved Colour Co-ordination	The fabric covered valance is available in 22 different colours, which provide colour co-ordination for the EasyRise, ULTRAGLIDE and LiteRise Operating Systems. The valance colours have been matched to the existing Standard Cord Lock hardware colours to allow for greater colour co-ordination amongst LUXAFLEX DUETTE Shades product offer.
LiteRise Operating System	The cordless LiteRise Operating System offers ease of operation at the touch of a finger. As well, the LiteRise Operating System has the added benefit of enhanced child safety with the elimination of operational cords.
EasyRise Operating System	The improved EasyRise Operating System allows for a much smoother operation, as well as the availability of the design option: Top-down/Bottom-up and Duo-Lite.
ULTRAGLIDE Operating System	The enhanced ULTRAGLIDE Operating System allows for an increase in size limitations and contributes to a much quieter and smoother operation of the shade. The elimination of the brake arm provides the shade with a cleaner appearance.
Design Options	The ULTRAGLIDE Operating System is available in four design options - bottom up, top down, top down/bottom up and Duo-Lite. The EasyRise Operating System is available in bottom up, top down/bottom up and Duo-Lite. The LiteRise Operating System is available in bottom up and top down/bottom up.
Light Block Strip	The EasyRise, ULTRAGLIDE and LiteRise Headrail features a light and dust trapping strip, which is inserted at the back of the Headrail reducing any light that may come through and trapping dust.

Child Safety

The EasyRise Operating System offers a child safety feature with its cord tensioner device which is mounted to either the wall or in the reveal. The retractable cord of the ULTRAGLIDE Operating System remains at the same length out of reach of children no matter the blind position. The LiteRise Operating System has enhanced child safety through the elimination of operational cords, the window covering is simply raised and lowered with your hand.
