

LUMINETTE® Privacy Sheers

LUXAFLEX® Window Fashions is Australia's largest and most inspirational Window Fashions provider for over 50 years. Testing and quality craftsmanship together with a 5 year warranty* makes LUXAFLEX® LUMINETTE® Privacy Sheers the perfect choice for your home.

WHY CHOOSE LUXAFLEX® LUMINETTE® PRIVACY SHEERS?

LUXAFLEX® LUMINETTE® Privacy Sheers are a visually striking alternative to sheer curtains with the benefit of translucent or room darkening vertical vanes that provide perfect light and privacy control.

PRODUCT FEATURE

The innovative wand and cord are combined into a single control for the perfect blend of form and function. With LUXAFLEX® LUMINETTE® Privacy Sheers you won't have unsightly cords to worry about, making them safer for children.

UNIQUE BENEFITS

LUMINETTE® Privacy Sheers are exclusive to LUXAFLEX® Window Fashions with their unique design that has a 180 degree vane rotation and travelling wand that allows for seamless movement of the shade with minimal light gaps. They are made from 100% polyester with a finished fabric header to conceal the operating system.

*"I love living with my LUXAFLEX® LUMINETTE® Privacy Sheers because they perfectly suit my home and I love having dual purpose blinds that combine the benefits of blinds and curtains in one along my sliding door"

WINDOW FASHIONS

Why choose LUMINETTE® Privacy Sheers versus other window covering styles?

- Provides the functionality of two blinds in one stunning shade to deliver light control and privacy. When open, the sheer vertical facings provide daytime privacy and maintains your view. With the vanes closed, night time privacy is assured.
- Having a single track with inbuilt pelmet eliminates the need for double tracks, curtain lining, pelmets, and draw backs, providing a minimal streamlined design which is soft and elegant.
- The unique sheer fabric facings provide a reduction of the sun's UV rays, depending on the fabric selected.
- Ideal for large windows or doorways as they allow instant access with the sliding of the shade which can be challenging with other styles of window coverings.

Why choose LUMINETTE® Privacy Sheers versus competitor products?

• Unique design

This product is unique and protected by a patent. Competitor products that may have some similarities do not feature the superior fabrics, in particular the way the sheers hang in a soft rounded position, or the fabric vanes which are part of the sheer's fabric blanket. They also do not feature the superior SOFTRACK® System.

• Piece of mind

5 Year Warranty* offered by a reputable long standing brand providing you with piece of mind in the unlikely event you need to make a claim.

The LUMINETTE® Privacy Sheers Range Overview

- Fabric choices of either 89mm or 120mm vane sizes.
- Choice of fabric sheers in a range of textured finishes and decorative effects. Some fabrics feature coloured vanes to enhance colour intensity, while others feature white vanes to achieve a natural ambience and superior light reflection.
- A choice of light control fabrics are available, from translucent light filtering or blackout for privacy. This allows you to maintain the same colour and style throughout the home with translucent vanes in the living area and blackout vanes in the bedrooms.
- Full 180 degree vane rotation allows vanes to be fully closed in both directions, allowing you to set the vane at a position that suits the angle of the light and adjust it throughout the day and night.
- SOFTRACK® Exclusive Track System features a scissor mechanism to perfectly align the vanes at all times. Smooth and effortless to operate, only one track is required. When the fabric is drawn across the track the track is not visible as the fabric pelmet perfectly covers the track.

Colour co-ordination

Matching fabrics allow you to team a sliding door covered with LUMINETTE® Privacy Sheers with a window covered in SILHOUETTE® Shadings in the same room.

Choice of operating methods

Standard combination wand with cord operation. Twist the wand to rotate the vanes, and pull the cord to retract the vanes. The wand sits neatly behind the first vane.

Optional travelling wand. Traverse the fabric by holding the wand and pulling the fabric across. Twist the wand to rotate the vanes.

Both options provide excellent child and pet safety as they do not have hanging cords.
