## SOLAR OPTICAL PROPERTIES

- AS** Heat Absorbance (%) The percentage of solar energy (heat) absorbed by the fabric. The higher the value the more heat is absorbed by the fabric.
- RS** Heat Reflectance (%) The percentage of solar energy (heat) reflected by the fabric. The higher the value the more heat is reflected by the fabric.
- TS** Heat Transmittance (%) The percentage of heat transferred through the fabric. The lower the value the less heat is transferred through the fabric.
- AL** Light Absorbance (%) The percentage of light absorbed by the fabric. The lower the value the more light is absorbed by the fabric.
- RL** Light Reflectance (%) The percentage of light reflected by the fabric. The higher the value the more light is reflected away from the fabric.
- TL** Light Transmittance (%) The percentage of light transferred through the fabric. The lower the value the less light is transferred through the fabric.
- SC** Shading Coefficient The efficiency of a fabric to provide shade. The higher the figure the more efficient at providing shade.
